

PERIODONTICS – INFORMED CONSENT FORM

For periodontal examination, diagnosis, non-surgical and/or surgical periodontal treatment

Patient Name: _____

Date of Birth / Age: _____ Gender: _____

Address: _____

Phone / Email: _____

Medical / Dental Record No.: _____ Date: _____

1. DIAGNOSIS / CONDITION

I understand that periodontal examination may identify gum disease (gingivitis or periodontitis), gum recession, periodontal pockets, bone loss, furcation involvement, tooth mobility, or other periodontal conditions. The diagnosis and treatment plan may be modified as clinical and radiographic findings become available.

2. PROPOSED TREATMENT

The proposed treatment may include, as appropriate: oral hygiene instruction and motivation; professional supragingival/subgingival debridement; scaling and root planing; periodontal maintenance; local antimicrobial therapy; occlusal adjustment where indicated; periodontal surgery (including flap surgery); regenerative procedures; bone grafting; guided tissue regeneration; crown-lengthening or related periodontal procedures; treatment of gingival recession; management of periodontal abscesses; and referral for extraction, restorative, endodontic, orthodontic or other treatment when indicated.

3. BENEFITS / EXPECTED OUTCOMES

The goals may include reduction of inflammation and bleeding, reduction of periodontal pocketing, improvement or stabilization of periodontal health, preservation of teeth and supporting tissues, and improvement of oral hygiene and comfort. I understand that treatment cannot guarantee complete elimination of disease or preservation of every tooth.

4. COMMON RISKS AND POSSIBLE COMPLICATIONS

I understand that periodontal treatment may involve temporary or persistent pain, tenderness, bleeding, swelling, bruising, infection, sensitivity to hot/cold, gum recession, changes in tooth appearance, food trapping, altered tooth contour, increased tooth mobility, root exposure, or discomfort during chewing. Periodontal surgery may also result in delayed healing, scarring, flap complications, or other unforeseen complications. Rare complications may require additional treatment.

5. ANESTHESIA

Local anesthesia may be used. I understand that injection-related discomfort, bruising, temporary numbness, prolonged numbness, fainting, allergic or other adverse reactions are possible, although serious complications are uncommon. I will inform the clinician of any previous reaction to anesthetics or relevant medications.

6. ALTERNATIVES

I understand that alternatives may include improved home care and observation, periodontal maintenance without additional treatment, different periodontal procedures, referral to another dental/medical specialist, or no treatment. I understand that choosing no treatment may allow periodontal disease to progress and may increase the risk of tooth loss and other complications.

7. HEALING AND POST-TREATMENT RESPONSIBILITIES

I agree to follow the clinician's instructions regarding oral hygiene, medications, diet, smoking/tobacco avoidance, activity restrictions, wound care, and review appointments. I understand that periodontal disease control requires continuing professional maintenance and effective daily plaque control. Smoking/tobacco use, uncontrolled systemic disease, poor oral hygiene, and failure to attend maintenance visits may adversely affect healing and treatment outcomes.

8. MEDICAL HISTORY / DISCLOSURE

I have informed the dental team about relevant medical conditions, allergies, pregnancy status where applicable, medications and supplements, previous surgeries, bleeding disorders, and other health information that may affect treatment. I understand that inaccurate or incomplete information may increase treatment risks.

9. RADIOGRAPHS / CLINICAL RECORDS

I consent to clinically indicated photographs, periodontal charting, radiographs and other diagnostic records needed for my care. Any use of records for teaching, audit or publication should be separately authorized according to applicable policy and law.

10. FINANCIAL / ADDITIONAL TREATMENT

I understand that the treatment plan and associated costs will be explained to me separately. Additional procedures may become necessary if clinical findings change. I will be informed about material changes in treatment whenever reasonably possible.

11. PATIENT CONSENT AND ACKNOWLEDGEMENT

- I confirm that the nature, purpose, expected benefits, material risks, alternatives, and consequences of declining treatment have been explained to me in language I understand.
- I have had the opportunity to ask questions, and my questions have been answered satisfactorily.
- I understand that no specific result or duration of benefit has been guaranteed.
- I voluntarily consent to the periodontal treatment described above and to clinically necessary modifications that are explained to me, subject to applicable consent requirements.

Patient / Legal Guardian Name: _____

Signature: _____ Date: _____

Relationship to Patient (if guardian): _____

Periodontist / Treating Dentist: _____

Clinician Signature: _____ Date: _____

Witness (if required): _____ Date: _____
